DATE MAILED: 08/21/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/511,712	Applicant(s) GENDRIER ET AL.	
	Examiner Thong Q. Le	Art Unit 2827	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 34-100 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 34,36,37,44,45,67,68,70-72,78 and 79 is/are rejected.
- 7) ☒ Claim(s) 35,39-43,46-66,69,73-77 and 80-100 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Pre-amendment filed on 10/15/2006 has been entered.
2. Claims 34-100 are presented for examination.

Information Disclosure Statement

3. This office acknowledges receipt of the following items from the Applicant:
Information Disclosure Statement (IDS) filed on 10/15/2006.
4. Information disclosed and list on PTO 1449 was considered.

Priority

5. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

7. Regarding claims 35-66, line 1, should be changed "A device" to –The device--.
8. Regarding claims 69-100, line 1, should be changed "A method" to –The method.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

10. Claims 34,36-37,44-45,67-68,70-72,78-79 are rejected under 35 U.S.C. 102(e) as being anticipated by Forbes et al. (U.S. Patent No. 6,936,849).

Regarding claims 34, 67-68, Forbes et al. disclose a semiconductor memory device (Figure 1) comprising:

at least one electrically erasable and programmable non-volatile memory cell (Figure 1) including

a layer of gate material (114, Column 4, lines 35-38);

a floating-gate transistor including a floating gate (106, Column 4, lines 44-46), and including source (102) , drain (104) and channel regions (110) defining a control gate;

a first active zone (Figure 3A 302);, and
a second active zone (Figure 3A, 304) incorporating the control gate and electrically isolated from the first active zone;
a dielectric zone (Figure 1, 118) between a first part of the layer of gate material and the first active zone (Column 4, lines 54-57) ;
the dielectric zone defining a transfer zone for transferring, during erasure of the memory cell, charges stored in the floating gate to the first active zone (Column 4, lines 4-8, Column 5, lines 9-23).

Regarding claims 36, 70, Forbes et al. disclose wherein the floating-gate (Figure 3D, 106) comprises an annular gate defined in the layer of gate material, and wherein the layer of gate material (Figure 3D, 118) includes a linking part between the first part and the annular gate (Figure 3D)

Regarding claims 37-38, 71-72 Forbes et al. disclose wherein the first active zone and the second active zone are electrically isolated from each other by reverse-biased PN junctions, and wherein the first active zone and the second active zone are electrically isolated from each other on a surface of the memory cell by an isolation region (Figures 3A, 3F, Column 6, lines 44-48).

Regarding claims 44,78, Forbes et al. disclose wherein the floating gate transistor comprises a PMOS transistor (Column 6, lines 35-49).

Regarding claims 45, 79, Forbes et al. disclose wherein at least one memory cell comprises a plurality of memory cells defining a memory plane, each memory cell including an access transistor (Figure 3H, 106).

Allowable Subject Matter

11. Claims 35, 69, 39-43, 73-77, 46-50, 51-59, 60-66, 80-100 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 35, 69, 39-43, 73-77, 46-50, 51-59, 60-66, 80-100 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Forbes et al. (U.S. Patent No. 6,936,849), and others, does not teach the claimed invention having wherein the capacitance of the transfer zone is less than or equal to 30% of the total capacitance between the layer of the gate material and the active zones of the memory cell, and wherein the first active zone is disposed in a first substrate region having a first type of conductivity, the second active zone is disposed in a second substrate region having the first type of conductivity, the first substrate region and the second substrate region are separated by a third substrate region having a second type of conductivity, different from the first, and wherein the isolation region extends between the first substrate region and the second substrate region and includes an aperture in a contact zone in the third semiconductor region, and wherein in the erase state, the bias device causes Fowler-Nordheim erasing by applying a voltage to the first active zone much higher than voltage applied to the source, drain and substrate regions of the floating gate transistor, and wherein the access transistor of a memory cell flanked by two adjacent memory cells located in a same column as the memory cell includes a first

Art Unit: 2827

elementary access transistor specifically associated with the memory cell and second and third elementary access transistors respectively common to two access transistors assigned to the two adjacent memory cells respectively, and wherein the at least one memory cell comprises a plurality of memory cells defining a memory plane, each memory cell including an access transistor; wherein the access transistor of a memory 11 comprises a gate extending perpendicular to the linking part and on the opposite side from the linking part with respect to the annular gate; wherein the source of the access transistor comprises a source contact, the drain of the access transistor forms part of the source of the floating-gate transistor of the memory cell, and the drain of the floating-gate transistor is electrically connected to the second active zone.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Le whose telephone number is 571-272-1783. The examiner can normally be reached on 8:00am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarabian Amir can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
